I describe my self as a lot of things. Some of them can be friendly, loveable, shy, kind and humble. People say am friendly because if they start to meet my, it will be easy to become friends with me because how I act and how I am with them. Am shy meeting people as well, I have to admit its hard for me to talk to I don't know but if they talk to me, it will be easier for me to socialize. Am kind and humble because on how I treat people and make them feel, some of them say I make them feel special and that really makes me happy.

Now to talk about my communication habits. As I mentioned am a shy person, so its hard me to communicate IF am the one starting a conversation. I mainly use social medias to talk to people if they are far away. Its easier this why because I don't have to be nervous when talking to something. If am using social media (for example WhatsApp) I use Stickers and emojis so I can express to them how am feeling or how am doing.
